

BIOBASE®

BIOBASE[®]

INTRODUCTION

BIOBASE Group is a professional manufacturer of laboratory products since 1999. Our main products are Biosafety Cabinet (Class I / II / III), Laminar Flow Cabinet, Fume Hood, Biochemistry Analyzer, Reagent, Autoclave and Incubator. We have more than 2000 employees and 20000 square meters production base. Our output per year reaches 10000 units. Pursuing the highest quality is the tenet of BIOBASE. We hope everybody will enjoy BIOBASE service to keep away from the infectious disease.

Our advantages:

- We built an excellent research team which consists of 50 professional engineers.
- We have 20 years production experience and a strong technical production team. And we adopt high-tech and state-of-the-art production equipment from Italy, Japan, and Switzerland, etc.
- We have a strong quality control team to inspect all production stage, from the purchased accessories to the finished products.
- We have full sets of advanced quality assurance equipments.
- We have ISO9001 quality management system; ISO14001 environment management system, ISO3485, CE mark, MET and NSF 49 certificate.
- We got EN 12469 certificate for Biosafety Cabinet in 2013.

PP Reagent Cabinet / Medicine Cabinet

BIOBASE

Integral type:BRPC-900P

PP Reagent Cabinet
/ Medicine Cabinet

Introduction:

Size: 900*450*1800mm (can be customized according to customer needs).

The cabinet is made of 8mm thick porcelain white PP board and seamlessly welded by PP welding rods of the same color and material, which greatly strengthens the structural firmness of the cabinet and effectively reduces the deformation of the cabinet due to thermal expansion and contraction. The PP material has the characteristics of resistance to strong acid, strong alkali and corrosion. It is safe to store some acid-base reagents and medicines. The laminate is made of 8mm thick high-quality pure PP board and is seamlessly welded by the same color and homogeneous welding rod. There are vertical edges around, and the vertical edges are integrally welded to form. The overall design is movable. It can be taken out and placed in a suitable compartment for free combination. The front and back of the laminate can be placed, and a certain degree of anti-overflow effect can be obtained from the surrounding standing edges.

Features:

- * This structure can classify and store chemicals of different nature and risk levels to reduce the occurrence of disasters.
- * The door is equipped with 5mm thick toughened glass see-through windows. The lower cabinet door can add ventilation holes according to customer needs,
- * The upper and lower cabinets are each equipped with a movable shelf, and customers can freely adjust the height of each layer according to their needs.
- * The upper and lower doors are each equipped with a blue acid and alkali resistant PP double-locking handle, which has good corrosion resistance.
- * The door hinge is made of blue acid and alkali resistant PP material, which has good corrosion resistance.
- * The upper and lower door panels are equipped with acid and alkali resistant PP pins and bumpers of the same color and quality, which has good corrosion resistance.

Packing Information:

Model	BRPC-900P
Product Size	900*450*1800mm (can be customized according to customer needs).
Packing Size	983*533*1935mm
Gross Weight	69kg
